-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 March 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Invention III and Species C, claims 28-34 in the reply filed on March 23, 2006 is acknowledged.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "56" and "84".
3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "152" has been used to designate both "flange" and "aperture". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 32 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as

the invention. Recitation of "said walls of said self-ligating insert" lacks sufficient antecedent basis.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 28-30 and 32-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Voudouris (2004/0072119). Voudouris discloses a self-ligating orthodontic bracket 10 comprising a metallic self-ligating assembly including an archwire slot 16 and a ligating member 18 movable between an open position and closed position, and a bracket body 12 configured to be mounted to a tooth, carrying the assembly and comprising a non-metallic material (figure 1). The non-metallic material is ceramic of polycrystalline aluminum oxide [0034]. As understood, self-ligating insert is wedge-shaped 57. The bracket comprises a metallic engagement member 52,54 capable of constraining movement of the member. The assembly further includes at least one guide 60.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3732

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Voudouris in view of Hansen et al. (6,142,775). Voudouris discloses a bracket that shows the limitations as described above; however, Voudouris does not show non-metallic material of claim 31. Hansen et al. teach a ligating orthodontic bracket comprising a body of polycarbonate (column 5 line 24). It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute the non-metallic material of Voudouris with polycarbonate as Hansen et al. show non-material of polycrystalline ceramic and polycarbonate as suitable material known in the art.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Georgakis et al. (6,554,612) is cited to show the state of the art with respect to self-ligating orthodontic bracket.
